CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Software Engineering. Passionate about Software Development and AI, with hands-on experience in building full-stack and AI-powered applications using Python, React, Flask, SQL, and modern development tools. Currently contributing to an AI-powered recruitment platform during my internship at JSL Works Pvt. Ltd. Seeking opportunities to build scalable software solutions and solve real-world engineering challenges.

EDUCATION

COER University

B.Tech in Computer Science and Engineering [2023-present]

CGPA/Percentage

CGPA: 8.09/10

Angels' Academy Senior Secondary School

Intermediate [2022-2023]

Percentage: 82%

Angels' Academy Senior Secondary School

High School [2020-2021]

Percentage: 93.8%

EXPERIENCE

JSL Works Pvt. Ltd.

UI/UX Documentation Intern [June 2026 – Present]

Project: HireLens (Alpha Verify)

Responsibilities

- Contributing to the development of an AI-powered candidate evaluation platform.
- Designing intuitive UI/UX interfaces for recruitment dashboards.
- Preparing System Design & Architecture documentation.
- Collaborating with backend developers for feature validation.
- Supporting AI-powered resume analysis and candidate evaluation workflows.
- Working with FastAPI, Streamlit, SQLAlchemy, SQLite, Git, GitHub, and Google Gemini AI.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript, SQL, Java(Basics)
- **Frontend:** React.js, HTML5, CSS3, JavaScript, Responsive Web Design
- **Backend:** Flask, REST APIs, Axios
- **Databases:** SQLite, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Vercel, Render, NPM
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Operating System, Database Management Systems, Machine Learning Fundamentals, Computer Networks

PROJECTS

Smart AI Expense Tracker — Full-Stack AI Financial Management System

Technologies: React.js, Flask, Python, SQLite, Tailwind CSS, Axios, Recharts, Git, GitHub, Vercel, Render

- Developed a full-stack AI-powered expense management web application using React.js, Flask, and SQLite for efficient financial tracking.
- Designed and implemented RESTful APIs for user authentication, expense management, budgeting, search, filtering, and CRUD operations.

- Built an interactive analytics dashboard with Recharts to visualize spending trends, category-wise analysis, and financial summaries.
- Integrated AI-powered features including expense forecasting, anomaly detection, financial health scoring, and personalized savings recommendations.
- Connected the React frontend with the Flask backend using Axios and managed application deployment using Vercel, Render, and GitHub.
- Implemented responsive UI components using Tailwind CSS and followed Git-based version control throughout development.
- Tested, debugged, and optimized application performance to improve usability and responsiveness.

Live Demo: <https://expense-tracker-ten-eosin-27.vercel.app/>

Real-Time Sign Language to Voice Conversion System

Technologies: Python, TensorFlow, OpenCV, MediaPipe, CNN

- Developed a real-time sign language recognition system using Computer Vision and Deep Learning techniques.
- Built and trained Convolutional Neural Network (CNN) models for accurate gesture classification.
- Implemented hand-tracking and feature extraction using MediaPipe and OpenCV for live video processing.
- Integrated Text-to-Speech (TTS) functionality to convert recognized gestures into real-time voice output.
- Optimized model inference and image processing pipelines to improve recognition accuracy and application performance.

AI-Powered Web Security Awareness Platform

Technologies: HTML5, CSS3, JavaScript

- Developed a responsive web application to educate users about common web security threats, cyber attacks, and secure browsing practices.
- Designed and implemented interactive learning modules, quizzes, and automated certificate generation to enhance user engagement.
- Integrated an AI-powered chatbot to provide real-time assistance and answer cybersecurity-related queries.
- Applied secure web development practices, client-side validation, and responsive UI design for improved user experience.
- Structured the application using a modular architecture to improve maintainability and scalability.
- Implemented DOM manipulation and JavaScript event handling to create interactive learning modules.

CERTIFICATIONS

- Google AI Educator Series – Foundational: Intro to Gemini
- Artificial Intelligence Fundamentals – Great Learning
- Artificial Intelligence for All – Infosys
- Career Edge - Young Professional course – TCS iON

STRENGTHS

- Problem Solving — Analytical Thinking — Software Development — Team Collaboration — Strong Communication Skills — Positive Attitude — Adaptability — Continuous Learning
